

- AGF- 1101 side mount block
- AGF- 1102 locking knob
- AGF- 1105 Metal screw special 3/16", hexagon socket
- AGF- 1106 extension
- AGF- 1108 screw M4x16, hexagon socket
- AGF- 1110 scale
- AGF- 1111 writing strip
- AGF- 1112 spindle
- AGF- 1114 lower support plate
- AGF- 1119 upper case
- AGF- 1122 push button
- AGF- 1134 liftable rotary knob for adjusting the point of origin vertically and horizontally
- AGF- 1137 screw M4x25
- AGF- 1143 cursor for writing strip incl. screw
- AGF- 1144 cursor for scale incl. screw
- AGF- 1152 hexagonal bar holder bottom
- AGF- 1153 hexagonal bar holder top
- AGF- 1154 hexagonal bar with scale
- AGF- 204 ring pin screw 70mm
- AGF- 1254 hexagonal bar for compound scopes with adjustable X, Y and Z axis
- AGF- 1255 Set of 1254/1265/1266 incl. screws
- AGF- 1264 stop collar incl. screws
- AGF- 1265 fixing nut
- AGF- 1266 counter nut
- AGF- 1267 hexagon socket screw M4x6
- AGF- 1270 screw M4x18, hexagon socket

# AGF - TIP TURN

Swiss made

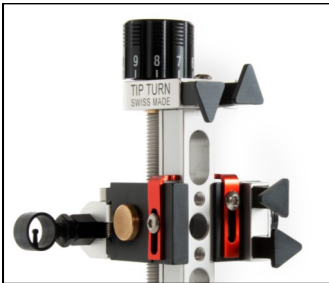

[www.agf-archery.com](http://www.agf-archery.com)

The AGF-TIP TURN is a new high-end precision sight, perfectly well constructed

The extension of these sights is hot pressed of high strength aluminium. In the production process the aluminium is heated to 500°C and then pressed into its shape with a weight of 400 tons.

As a result the extension is very strong, lightweight and produces clearly less unwanted vibrations.

All small parts are produced accurately with a lot of care and reveal the high quality of these sights. There are adjustable red cursors made of aluminium. Because of the minimal distance between cursor and scale there is no parallax error.

This sight features an easy quick adjustment with push button.

**The AGF-TIP TURN comes with a very special and ingenious fine adjustment, in addition the the rotary knobs.**

V-shaped push buttons move the slide block incl. scope in small steps.

Every click on the button equates to 0.1mm.

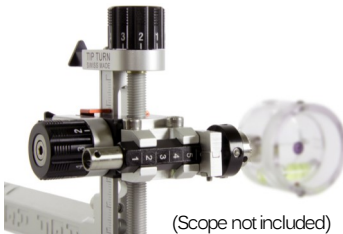

10 clicks equate to 1 full turn of the rotary knob.

**The v-shaped buttons indicate the direction where you want your arrow to go.**

for example: Arrow should go higher - click on the upwards push button

(The slide will move downwards. That way the arrow will aim higher.)

So even in a stressful situation (competition) it will be perfectly easy and save to adjust your sight.

(Scope not included)

## Compound Version

We have developed a hexagonal bar for scopes with adjustable X, Y and Z axis. Part AGF-1255.

The compound version comes with part AGF-1255 and part AGF-1264 (stop collar).

AGF-1255 without stop collar

AGF-1255 with stop collar (AGF-1264)

The adjustable hexagonal bar AGF-1255 can be purchased separately, with or without stop collar.

So you can change a recurve AGF-TURN or TIP TURN to a compound sight or you can use several different scopes and exchange them within seconds.

The printed scale already makes it easy to position the hexagonal bar precisely.

With the stop collar you can fix your chosen position with absolute accurateness.

## Overview AGF-TIP TURN

**High-end precision sight with revolutionary fine adjustment with click buttons**

hot pressed aluminium extension, lightweight

quick adjustment per push button

turning knobs with adjustable point of origin

strong fixation on the bow

scale and separate writing strip with adjustables cursors, easy reading

exchangeable hexagonal bar with scale

special compound hexagonal bar for scopes, adjustable X, Y and Z axis

Lefthand version available

maintenance free and weather proof, lightweight and strong
